

Welcome to INFÖR-group at Södertälje Hospital!

The INFÖR-group offers you a personal contact with the maternity team at the hospital in preparation for your pending birth.

The INFÖR-group is a group organized for the purpose of giving you a safer birth experience. In the group we are midwives with longstanding experience within maternity team.

Our aim is to reach foreign born women whose relatives do not speak Swedish and whom are not familiar with the Swedish healthcare provision. We offer a personal contact with a midwife from the INFÖR-group at BB Södertälje. We aim to guide and offer you a better understanding of the childbirth pathway to help you prepare for your birth and the postnatal period.

All conversations and meetings will be together with an interpreter, and confidentiality applies as with all contact one has with Swedish healthcare.

Welcome!
